## Information fragmentation

### Different information sources:

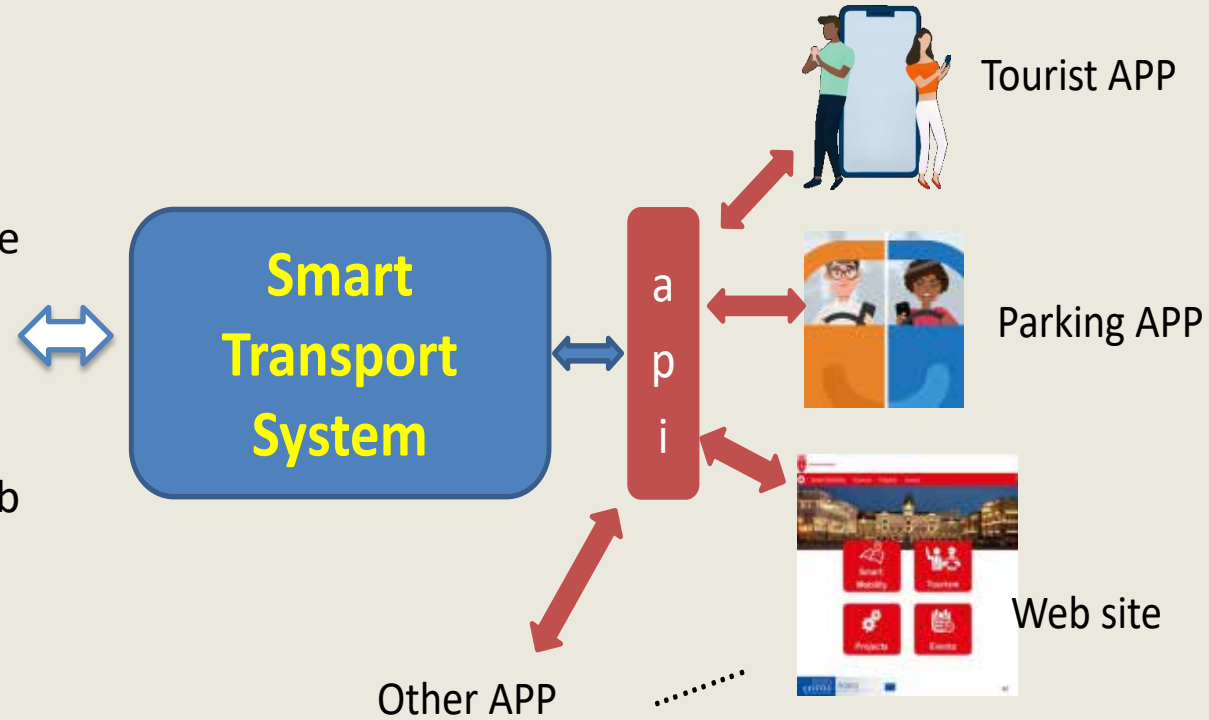

- Municipality web site
- Tourist web sites
- Telegram channel of the municipality
- Private tourist information
- Public transportation web site
- Events repository

### Electronic information:

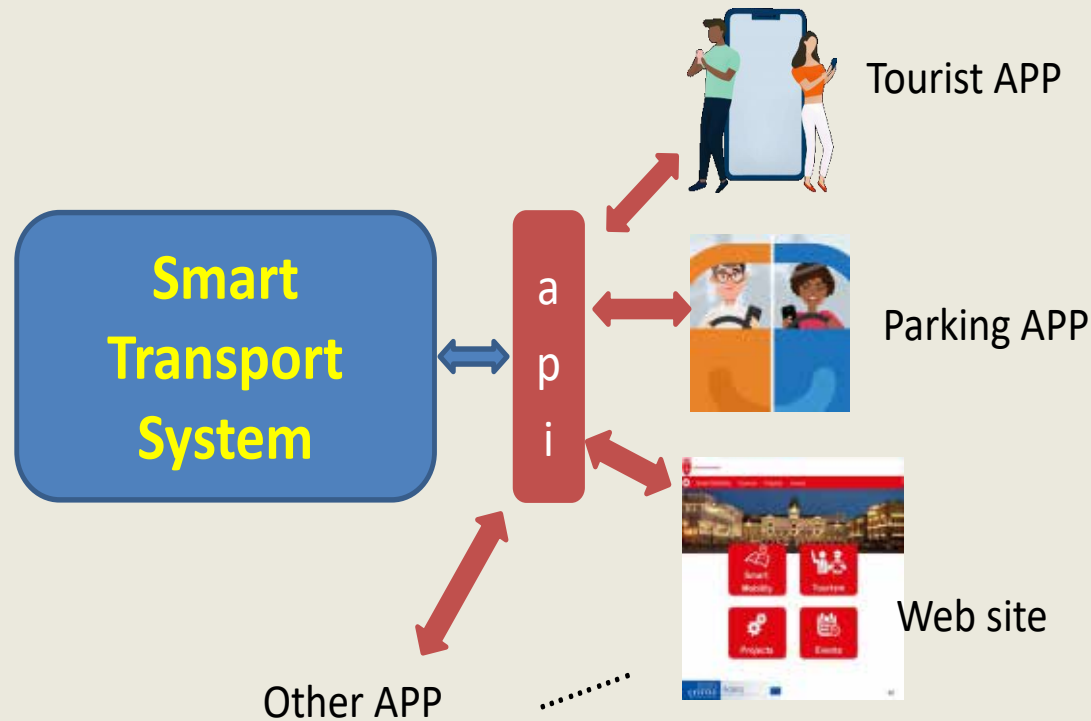

- Municipal ordinance
- Real time road interruption

## One repository -> infinite applications

- Municipality web site
- Tourist web sites
- Telegram channel of the municipality
- Private tourist information
- Public transportation web site
- Events repository

## One repository -> infinite applications

### Pros:

- The api layer all the information can be used in order to create new and different applications.
- Scalability

### Cons:

- Definition of data format exchanged
- Accounting
